

aumentoo GmbH

App Developer (iOS, Android)

Your Challenge

Are you interested in developing new features for an innovative app that is used by corporates as a successful innovation management platform?

Do you love mastering challenges, taking over responsibilities, working in a young and talented team and being part of the business success?

Are you open-minded, motivated and like working independently on given tasks?

Do you enjoy a diversified working life?

Don't hesitate - apply!

You get the chance to be part of our success story while working in a small and young team on a software for the leaders and board members of the biggest German corporations.

Your Qualifications

- You have wide knowledge of Objective-C/Swift and Kotlin
- You have already gained experience as an iOS and/or Android app developer
- You are highly quality-oriented and detail-conscious
- You are a team player who is fluent in German and English
- You are familiar with the latest trends of the app development and you love to experiment with new technologies

Your Benefits

- Working with modern work equipment like MacBooks
- Different training and development opportunities
- Flexi working hours and the option to work remotely
- Active participation in the growth of the company and product
- Flat hierarchies and fast decision making processes
- Weekly workouts with our personal coach
- Extraordinary working atmosphere (AirHockey and Nintendo Wii-Challenge or a DJ desk as creativity stimulation)
- Free fair trade coffee and energy drinks
- Work in the most beautiful German area in the middle of the Allgäu and its gorgeous mountains and lakes where you have lots of leisure and outdoor activities to discover

Company Description

aumentoo GmbH is a software development startup, located in Kempten.

We are developing the leading innovation platform to boost the innovation capacity of companies by improving their startup and innovation management process.

Our customers are corporates and accelerators of the DACH region that are willing to work with startups to bring efficiently external innovations into the company.
